

AMENDMENTS TO THE SPECIFICATION

Replace the paragraph on page 7, lines 13 –16, with the following paragraph:

a! Once a signal is demodulated, the digital data stream is demultiplexed into its constituent elements such as video, audio, graphics, and data. The demultiplexed digital data stream is directed to the appropriate decode devices, i.e., video to video decoder, audio to audio decoder, graphics to display driver and control data to applications software.
